EXPERIENCE

DevOps Engineer

Jun. 2026 – Present

ASIAPAY GROUP HOLDING LIMITED

- Operate and improve **AWS EKS** clusters for UAT environments, focusing on Kubernetes networking, workload scheduling, scalability, and platform reliability.
- Implemented **Amazon ECR lifecycle policies** to automatically clean up unused container images and reduce container registry storage costs.
- Researched and evaluated **CloudWatch Application Performance Monitoring (APM)** and auto-instrumentation approaches for Java applications running on EKS, providing configuration recommendations to application teams.
- Researched and tuned Kubernetes workload configurations, including **CronJob scheduling, resource requests/limits, Horizontal Pod Autoscaling (HPA), and Vertical Pod Autoscaling (VPA)**.
- Investigated **Amazon VPC CNI** networking architecture and configuration to improve pod networking, IP address allocation, and EKS cluster scalability.

System / DevOps Engineer

Jun. 2025 – March. 2026

Logic Solutions Inc.

- Designed and maintained **Rocky Linux-based EC2 AMIs** using Packer, standardizing system images and improving deployment consistency and reproducibility
- Operated and maintained **hybrid cloud infrastructure (AWS and on-premise)** within the Taiwan engineering team, implementing **Git-based Infrastructure as Code workflows (Terraform / Terragrunt / Atlantis)** to improve change traceability and deployment stability
- Built **Ansible-based system initialization automation** (Linux configuration, Java runtime, Nginx, RabbitMQ, NFS), reducing manual setup effort and improving scalability
- Designed and maintained **Jenkins CI/CD pipelines (Groovy)** to support multi-environment deployments and improve delivery reliability
- Managed **Bastion host and internal asset tracking system (Consul + Golang services)**, integrating EC2 metadata into centralized access control mechanisms
- Analyzed system performance using **Prometheus and Grafana**, identifying infrastructure bottlenecks and proposing optimization strategies such as resource tuning and scaling
- Maintained **observability stack (Prometheus, Grafana, Consul)** to ensure stable monitoring operations
- Reviewed cross-region infrastructure processes and technical documentation, identifying inconsistencies and improving collaboration efficiency across teams

System / Site Reliability Engineering (SRE) / DevOps Engineering

Nov. 2023 – Dec. 2024

Mending Technology Co., Ltd.

- Provided system operation and troubleshooting support in **Linux-based production environments**, ensuring service availability
- Participated in **on-call rotations** (approximately one week per month), handling **production incidents** including service failures, resource bottlenecks, and deployment issues
- Performed **root cause analysis (RCA)** for production issues, identifying causes such as Kubernetes deployment failures, resource constraints, and service dependency issues
- Supported a **cryptocurrency exchange platform** running on **AWS and on-premise infrastructure**, ensuring stability of critical services
- Managed and maintained **Kubernetes (k8s) clusters**, handling scheduling issues, deployment failures, and service disruptions to improve system reliability and recovery capability
- Implemented **infrastructure automation using Pulumi and Ansible**, improving environment consistency and reducing manual operational risks
- Maintained **CI/CD pipelines (GitLab CI / Jenkins)**, supporting application deployment and troubleshooting pipeline-related issues

Site Reliability Engineering (SRE) / DevOps / Cloud Engineering

Nov. 2021 – Apr. 2023

CloudRock Technology Co., Ltd.

- Performed system operations and troubleshooting in **Linux environments**, supporting distributed service stability
- Participated in **on-call rotations**, handling production issues and assisting in root cause analysis (RCA)
- Developed a **Python-based automated monitoring system** for website health checks and anomaly detection, improving issue detection efficiency
- Contributed to building a **streaming platform** on **GCP (GKE)** and **Alibaba Cloud (ACK)**, supporting cross-cloud deployment and operations
- Managed multi-cloud infrastructure (**AWS / GCP / Alibaba Cloud / Cloudflare**) using **JumpServer**, improving access control and operational consistency
- Operated and maintained **Kubernetes clusters (EKS / GKE / ACK)**, handling container scheduling, service deployment, and issue troubleshooting
- Maintained **CI/CD pipelines (GitLab CI / Jenkins / Tekton)**, improving deployment efficiency and system stability

IoT Bootcamp (Full-Stack & System Fundamentals Training)

Jan. 2021 – May. 2021

Industrial Technology Research Institute (ITRI)

- Completed an intensive **hands-on training program** covering Linux systems, networking fundamentals, web development, and system programming
- Designed and implemented an **IoT monitoring system (IndoorAirBox)** using **Raspberry Pi** and **ESP8266** for temperature and humidity data collection
- Built an end-to-end workflow from **data generation → transmission → processing**, validating system integration across components
- Gained hands-on experience integrating embedded devices with Linux-based systems, strengthening system design and problem-solving skills

PROJECTS

homelab

Jun. 2023 – Present

- Built and maintained a **Proxmox VE-based virtualization platform** to support multi-node Linux environments and infrastructure experiments
- Implemented **Infrastructure as Code (Terraform)** and **configuration management (Ansible)** to automate VM provisioning and system initialization
- Deployed and operated **Kubernetes clusters (k0s / k3s)** for service deployment, networking configuration, and failure troubleshooting practice
- Integrated **Prometheus** and **Grafana** for monitoring and performance analysis, identifying resource bottlenecks and improving system observability

EDUCATION

National Dong Hwa University

Sep. 2016 – Jan. 2019

Master of Science in Materials Science and Engineering

Shoufeng, Hualien

- **Thesis:** Ultrafast Pump-probe Transient Absorption Spectroscopy of Layer-controllable Molybdenum Disulfide Films
- **Research:** Semiconductor Materials

National Dong Hwa University

Sep. 2012 – Jun. 2016

Bachelor of Science in Materials Science and Engineering

Shoufeng, Hualien

- Program of Advanced Materials

SKILLS

Languages: Mandarin (native), English (professional working proficiency)

Programming: Python (proficient), Bash, SQL; familiar with Java and Golang

Backend & Frameworks: FastAPI, Django, SQLAlchemy, RESTful API design

Cloud & Infrastructure: AWS, GCP, Alibaba Cloud, Cloudflare; Terraform, Terragrunt, Pulumi, Ansible

Containers & Orchestration: Docker, Kubernetes (EKS, GKE, ACK, k0s, k3s)

CI/CD: GitLab CI, Jenkins, GitHub Actions, Tekton

Observability: Prometheus, Grafana

Messaging: RabbitMQ, RocketMQ

System & Networking: Linux, Nginx, basic networking fundamentals

Certification: AWS Certified Solutions Architect – Associate
